

Leinweber's LIQUID LATEX and VINYL-CRETE LIQUID

A milky-white liquid emulsion, our S/B latex additive, ***Leinweber's LIQUID LATEX*** is mixed with ***JIF-SET*** and ***ELASTEX Powders***. ***VINYL-CRETE Liquid*** (a higher solids content latex additive) is mixed with ***VINYL-CRETE Powder***.

Leinweber's LIQUID LATEXES can also be mixed with:

Portland cement / sand mixes

Bagged concrete mixes and bagged sand/topping mixes

Mortars

Grouts

Any quick setting underlayment / patch / floor topping material (do not use with those products which contain dry, dispersable latex in the powder)

Can be used to seal off and stabilize dusty concrete surfaces

Improved performance properties over water-only mixtures:

Excellent workability / easy to mix

Superior adhesion / triples bond strength / doubles tensile strength

Water and chemical resistant / reduces gas permeability

Increases flexural strength / bridges hairline cracks

Improves protection from extreme freeze - thaw damage

Freeze-thaw stability - 2 cycles / Approximately 2 year shelf-life

Available in: One-gallon plastic jugs with replaceable cap

Five-gallon plastic pails with replaceable lid
